Hi <FirstName>,

Do you have a gut feeling that you're being spied on?

I know I do.

I can't count the number of times I've heard the words "surveillance state" this past week.

Privacy is one of the biggest issues of our century. But I doubt most people understand what's at stake.

Maybe you've seen those viral videos about how Google listens through your device's microphone - so they can send you "personalized ads" based off of what you say.

Well, that's just a convenient excuse for why they are REALLY spying on you.

Have you ever wondered how Google and Facebook can be among the wealthiest companies in history, even though all of their core services are free?

That's because YOU are the product. They can afford to be "free" because they get something more valuable than your money...

They get your data.

And it doesn't stop there... its not just about surveillance. It's about control. They use YOUR data to feed their AI systems specifically designed to create an intense profile on you.

I know it sounds crazy, but it's true.

Look no further than how they are able to "personalize" your social media feeds.

This system is already in place and used to manipulate you... alter your perception of the world... and program your behavior.

Why are they doing this? Because Big Tech IS Big Brother.

And Big Brother is escalating their march to digital totalitarianism at breakneck speeds.

Countries all over the world have been rolling out new "Digital IDs", all marketed with "greater good" arguments...

When in reality, these digital IDs will be used to monitor your every move and set up the backbone for a Social Credit System in the West.

Pair this with AI, facial recognition cameras, carbon credits, CBDCs, and power-hungry globalists... then, you are looking at the MOST powerful system of control to ever exist.

So, is all hope lost? Should we give up and surrender before this system is even in place?

NO!

After talking with my friend Glenn Meder, I am hopeful that we can enter a Golden Age of Liberty, Prosperity, and Privacy...

But the key is: YOU need to take action...

That's why I've asked Glenn, an online privacy and security expert, to show you the necessary steps in his webinar on [Wednesday, MONTH / DATE at 7pm. \(8 pm ET/ 6 pm MT/ 5 pm PT\)](#)

Reclaiming your privacy is A LOT easier than you think – especially, if you know where to start and have a privacy expert to guide you.

Glenn's class is titled: *"TOP 5 STEPS TO EXIT THE SURVEILLANCE STATE & PROTECT YOURSELF ONLINE"*

You do not have to be tech savvy to take back your privacy...

You don't need any high-level technical skills...

All you need is the ability to use a browser and a desire to protect your freedom.

Glenn will even stay on to answer your questions live!

If you feel overwhelmed because you think there's no way to protect your online privacy, you need the strategies Glenn is giving away for FREE!

It's time to take back your privacy.

SWIPE TWO Send Day Of (Optional)

Subject: %FIRSTNAME%, only a few hours left to get your FREE ticket

I am sure you've heard about CBDCs, Social Credit Systems, and Digital IDs by now, right?

These are some of the biggest threats to our freedom right now - and the people running our institutions are starting to roll out this nightmare system with or without your approval.

But here's the thing...

This Orwellian dystopia depends on one thing you still have control over. It all depends on their ability to collect and see your online data.

Without that data, it crumbles into dust. And YOU have the ability to cut off their access to your personal data.

My friend Glenn Meder is going to show you how to protect your privacy in an exclusive, live Online Privacy Master Class.

This is a free 1-hour educational class - LIVE today at 7pm CT (8pm ET / 6pm MT / 5pm PT)

[>>> Click here to join the FREE webinar now <<<](#)

It's time for you to take back your privacy...

And it's A LOT easier than you imagine.

Glenn is an expert on teaching everyday, NON-TECHY people how to get private and secure online. So, don't worry if you're not a tech geek.

You're not going to be left scratching your head – because Glenn will carefully and slowly walk through the basic steps you need to take to make your data off-limits to the power-hungry psychopaths who want to use it against you.

Privacy is quickly becoming THE issue of our time.

So, ask yourself, what kind of world will your children inhabit if you don't do your part to defend our freedom?

The good news is, in just a few steps, you can opt out of being spied on and reclaim your God-given right to privacy.

SWIPE THREE Send Day After

Subject: The class replay is up! (It was great)

Did you see last night's class?

It was great!

If you haven't seen it yet, [you can watch the replay here.](#)

72% of Americans said they are "very concerned" to "extremely concerned" about their online privacy.

I consider myself to be part of that 72%.

Because without privacy, you can have no freedom.

With modern technology (like phones, computers, and smart devices), big tech companies and government agencies can gather information like:

- Your location (at all times)
- Your interests (especially politically)
- Who you are friends with
- Where you store your finances.
- Not to mention live access to the cameras and microphones on your devices.

But here's the key point: it's not just that they have all of this data sitting in the world's largest file cabinet, collecting dust...

They are ACTIVELY using this information to control you.

One of the core reasons that AI was created was because they needed to find a way to utilize the massive amounts of data that they are collecting.

And with the AI that exists today, they know and understand you BETTER THAN YOU KNOW YOURSELF.

It's a huge violation of our 4th Amendment rights, and it opens the door for things like CBDCs, Digital IDs, and even Social Credit Systems.

Getting private online may seem overwhelming. Most people think it means losing the convenience of modern technology.

That's not true at all.

In fact, by learning how to get private and secure online actually makes the internet easier to use.

After I took back my privacy online, I no longer have endless ads bombing my feed...

I only have to remember the password (to get into my password manager)... and I get to sleep easy – knowing my information is safe from Hackers, Big Tech, and Big Brother.

Last night, privacy expert Glenn Meder taught a must-watch, free lesson for non-techy, everyday people on how to go private online.

Glenn is the founder of Privacy Academy, an online program designed to help average, non-techy people exit the surveillance state. At the end of the class, Glenn let us know that he is holding a special discount on his course Privacy Action Plan: Fundamentals.

You can [check out the great discount here.](#)

Not only is he offering a 50% discount on the program, but he is also adding in a 2-month free trial to his Privacy Academy membership, where you get access to weekly live trainings (with replays), monthly Q&A's, and an active chat room moderated by his team of privacy experts.

The special offer and replay come down this Sunday night at midnight, so if you are interested please take advantage of it.

So, act today. Save money and take back your privacy while you still can.

SWIPE FOUR – Send the last day of the event (Sunday).

Subject: Last chance to take back your privacy...

Hi <First Name>,

Earlier this week Glenn Meder held a special webinar all about how you can reclaim your privacy online.

[You can watch the replay here!](#)

Glenn showed how we are living in a surveillance state.

Then he showed a powerful breakdown of all the ways you can put a stop to Big Tech, governments, and thieves spying and recording everything you do online without your knowledge or consent.

And as a thank you to everyone who attended the class, Glenn also gave a great discount to his course – Privacy Action Plan: Fundamentals.

His program is designed to teach you how to get private and secure online for the sake of liberty. He created it because he wants to prevent CBDCs, Digital IDs, Social Credit Systems, and other forms of Government overreach.

And best of all, the course is designed for average, non-techy people.

It's the best way to get private and secure!

You can [check out the special offer for his course here.](#)

Not only is he offering a 50% discount on the program, but he is also adding in a 2-month free trial to his Privacy Academy membership, where you get access to weekly live trainings (with replays), monthly Q&A's, and an active chat room moderated by his team of privacy experts.

The class and special offer come down tonight at midnight.

Thank you!
